

Researcher Profiles

in Web of Science

Publons has joined Web of Science. Build, manage and maintain your scholarly presence with simple tools on one trusted platform—the Web of Science. Sign in and manage your profile at webofscience.com.

An example profile:

Author information:

- Preferred name
- A green check mark indicates a claimed and verified profile
- Published names and recent affiliations
- Awards
- Link to ORCID if enabled by the author

Manage your personalized Web of Science experience here. Add publications and peer reviews, and if you use Web of Science, manage your saved searches and alerts.

Publications can be added by claiming author records, or syncing with ORCID. By default Web of Science Core Collection publications are displayed. Check the box to also include publications from other sources.

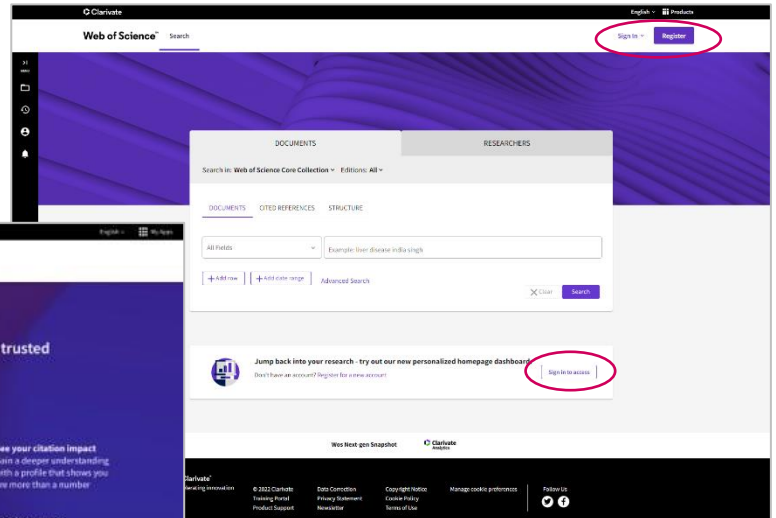

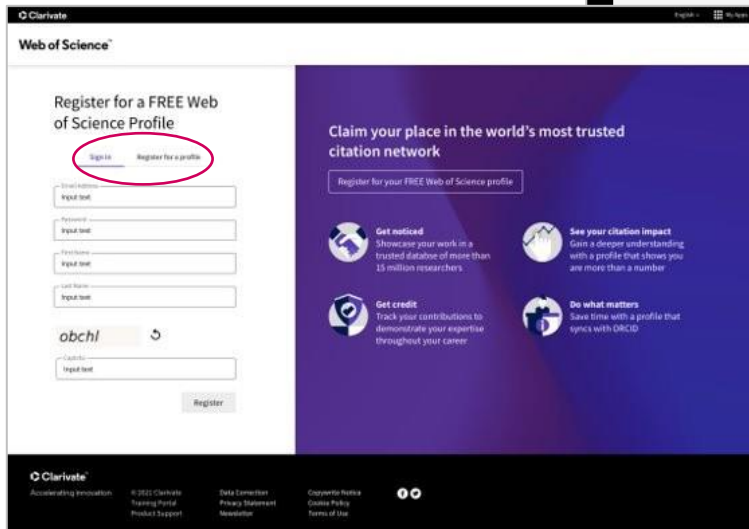

Display your peer reviews, grant reviews, board memberships and editor records (those for which the researcher coordinated the review process).

Metrics Dashboard displays a summary of publication and citation data. Click the Dashboard button to reveal additional visualizations.

The **Author Impact Beamplot** provides normalized citation data for this author profile. Citation counts are compared to other documents of the same age, type and subject.

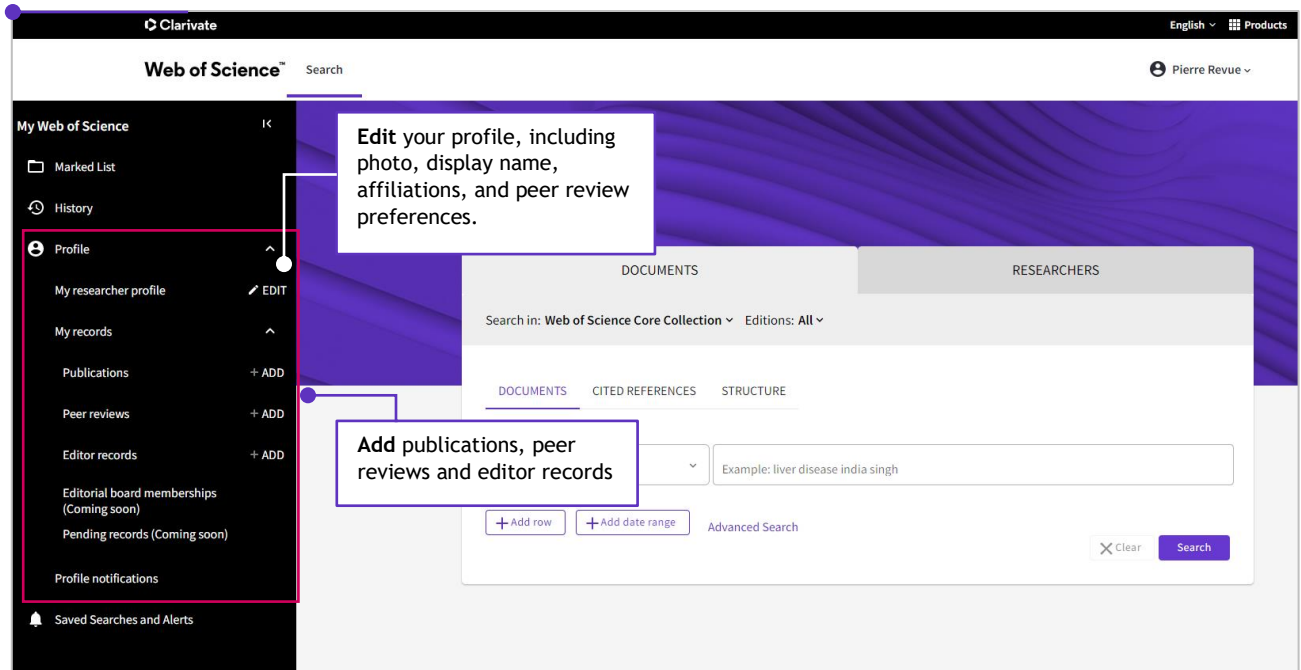

1. Sign in and manage your profile

From webofscience.com use your existing Publons or Web of Science credentials to sign in and manage your profile. If you're new register for a free account.

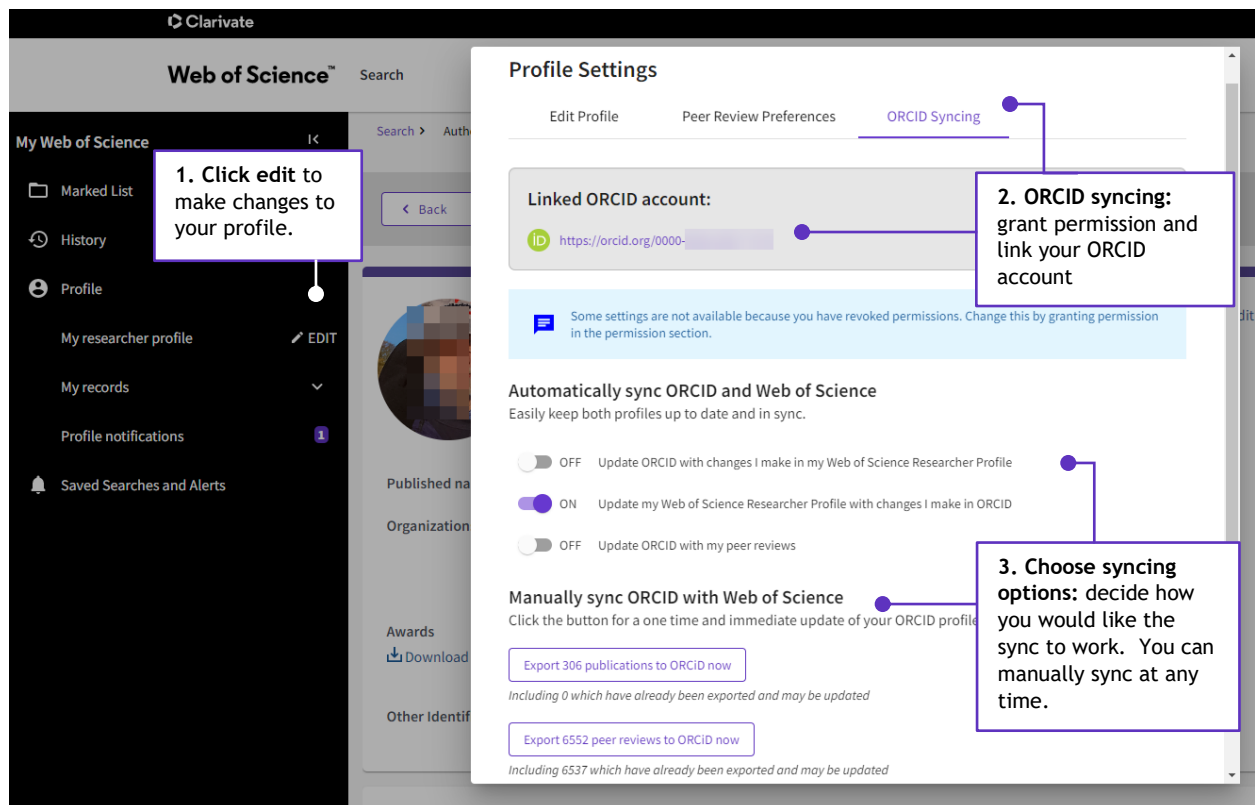

2. Add publications and peer reviews, edit your profile, and more...

Once logged in, use the left navigation menu to make changes to your profile.

3. Sync with your ORCID account

Keep both profiles up to date from one place. If you have already synced your Publons account to ORCID, no need to do it again. Those settings will be active in the new environment.

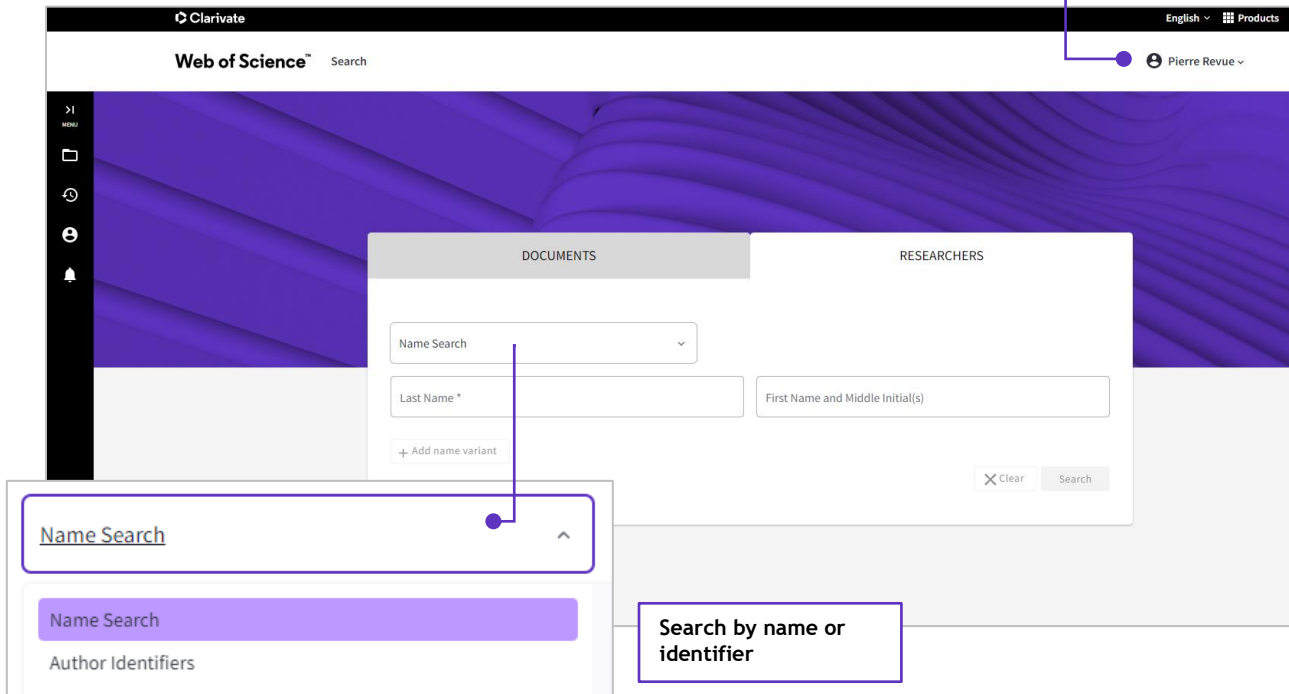

The screenshot shows the 'Profile Settings' page in the Web of Science interface. The 'ORCID Syncing' tab is selected. Three callouts provide instructions:

- 1. Click edit to make changes to your profile.** This callout points to the 'EDIT' button next to 'My researcher profile' in the left-hand navigation menu.
- 2. ORCID syncing: grant permission and link your ORCID account** This callout points to the 'Linked ORCID account' section, which shows a linked ORCID ID and a message: 'Some settings are not available because you have revoked permissions. Change this by granting permission in the permission section.'
- 3. Choose syncing options: decide how you would like the sync to work. You can manually sync at any time.** This callout points to the 'Automatically sync ORCID and Web of Science' section, which includes three toggle options: 'Update ORCID with changes I make in my Web of Science Researcher Profile' (OFF), 'Update my Web of Science Researcher Profile with changes I make in ORCID' (ON), and 'Update ORCID with my peer reviews' (OFF). Below this, the 'Manually sync ORCID with Web of Science' section is visible, featuring buttons to 'Export 306 publications to ORCID now' and 'Export 6552 peer reviews to ORCID now'.

4. Find peers and collaborators with Researcher search

As a **registered user**, search the claimed profiles of others by name or identifier. If you are also a Web of Science subscriber, searching also includes unclaimed author records and documents.
